14/16/20/25BRJ-7 AC

Hyundai Reach Trucks - Environmental-Friendly

Superior Power & Optimal Performance

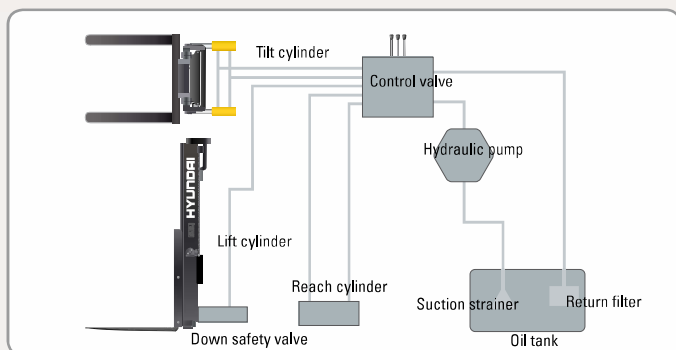

Smooth running, efficient and ergonomically designed, 14/16/20/25BRJ-7 series are built to meet your needs.

*Photo may include optional equipment.

Excellent Grade-ability & Anti-Roll Back

Three wheels configuration and a powerful drive motor provide for exceptional stability and excellent grade-ability. When departing on a slope, an anti-roll back function ensures operational safety.

State-of-the-art Hydraulic System

The latest designed, large-capacity hydraulic system including a low-noise control valve shortens reaction time during operation and improves both efficiency and durability.

Minimum turning radius

For narrow aisle operation, the compact design guarantees work efficiency and maximum space utilization.

Automatic Center Position at Starting

When starting your reach truck, the drive wheel of the truck will automatically turn to center position.

FWD/REV Switch

The driving direction can be controlled easily with the convenient position of the Forward/Reverse switch.

Versatile Reach Stroke

The multi-roller reach assembly provides smooth, well controlled and safe load handling, extended reach allows unsurpassed versatility.

Electro-Magnetic Brake

Increased brake performance and controllability by electromagnetic wheel brakes.

*Photo may include optional equipment

High Technology ZAPI Controller

The efficient, almost noiseless, 8Khz (high frequency) controller provides smooth operation, fault detection, protection for low & high voltage and overheating.

Energy Efficiency

H(High) mode : 100%
N(Normal) mode : 110%
E(Economic) mode : 120%

Drive Motor & Pump Motor

Efficient AC motors are guaranteeing reliability; an optimized motor design provides low noise levels. Temperature sensors inside are increasing the motor life.

*Photo may include optional equipment

Self - diagnosis LCD Monitor

The LCD monitor has a back-light system to provide a clear view of the system's operation in all circumstances. The monitor provides information about operation errors, system faults, battery level, hour meter plus other functions.

Cup Holder, Console Box & Storage Space

Additional storage spaces are located inside the operating space for operator's convenience.

Comfortable Operation

A design based on human engineering relieves fatigue and increases operator's efficiency.

New Designed Steer Control Handle

A new designed steer control, coupled with our new Electric Power Steering control, gives the operator an exceptional smooth and controlled steering.

Proportional Fingertip Control

Minimal operator effort is required for precise, safe and productive control. The operator can control his truck very easily with fingertip controls.

Camera & LCD monitor (Option)

A camera installed on the forks provides the operator with excellent visibility. (Recommended for masts taller than TF700)

New High Visibility for Safe Operation

The operator is able to work with increased safety and accuracy due to a wider view.

Comfortable Operator Environment

A straightforward designed full suspension seat is fully adjustable for an optimal work position, reducing operator fatigue.

Strong Overhead Guard

The safety overhead guard meets EEC and ANSI regulations and protects the operator during hazardous jobs.

Headrest Cushion Pad

A large cushion pad is positioned for operator safety and comfort.

Non Slip Floor Mat

A heavy non-slip floor mat with vibration dampers reduces operator fatigue and increases productivity.

Brake and Accelerator Pedal

The balanced design of the pedals (with replaceable covers) is offering high controllability and a convenient working position.

Durability, Easy Maintenance

An ideal arrangement of components ensures easy access and convenience for maintenance.

DC-DC Converter

Concentrated Fuse Box
for Easy Inspection

Reliable MOSFET
Type Controller

Battery Disconnect Lever &
Emergency Switch

Hydraulic Filter

Easy Battery Replacement

ORFS (O-Ring Face Seal)

ORFS type hose prevents hydraulic oil leakage.

*Photo may include optional equipment.

Optional equipment

- Different masts (up to 12 m)
- Different forks
- Beacon lamp (Amber, Blue, Red)
- Safety switch-mast (Fork & Traction speed reduction over 3m height)
- Fork camera (Mast TF700 ~ TF1200)
- Cold storage
- Larger battery compartment for higher battery capacity
