High Power & Performance

Powerful Engine Mitsubishi S6S-T Engine

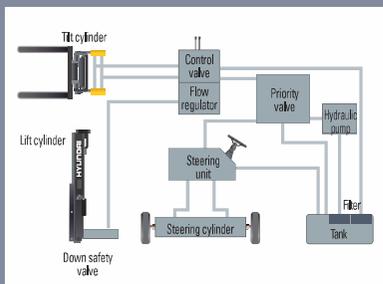

The six cylinders turbo-charged engine is built for power, reliability and economy. This engine meets EPA tier III and EU stage III emission regulation.

67.7kW/2,300rpm

State-of-the-art hydraulic system

The latest large-capacity hydraulic system reacts quickly during operation, and a low-noise control valve increases both efficiency and durability.

The new master on the job-site!

Smooth running, efficient and ergonomically designed, 35/40/45DS/50DA-7E series are made to meet your needs.

Some of the photos may include optional equipment.

Increased mast tilting angle

The mast tilting angle of 8 degrees forward and 10 degrees backward, the operator can safely and rapidly perform loading and unloading jobs.

Wet disc brake system (Option)

The wet disc brake system is virtually maintenance free and is enclosed to protect from dust and water.

Fully hydrostatic power steering

A hydraulic steering system always guarantees smooth and flexible steering, preventing overrun and kick-back.

OPSS (Operator Presence Sensing System)

Control of mast tilting, lifting and lowering is not possible through operation of the appropriate control when the operator is not in the normal position. (Option)

Fast and stable performance

Being able to quickly raise and lower the mast, as well as tilt it forward and backward, providing the best operational conditions during unloading. When the truck is fully loaded, mast lowering speed is carefully controlled to ensure safety by the down control valve.

Faster travel speed & gradeability

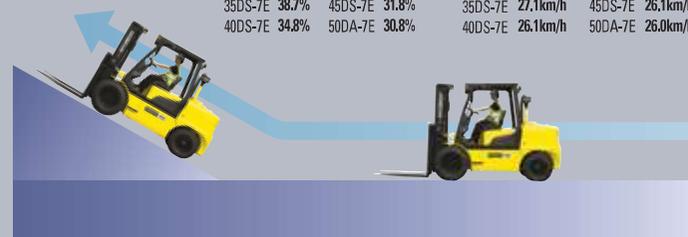

The powerful high-output engine provides greater acceleration, better gradeability and faster travel speed on any tough terrain or slope.

Gradeability (Loaded)

35DS-7E	38.7%	45DS-7E	31.8%
40DS-7E	34.8%	50DA-7E	30.8%

Travel speed (Unloaded)

35DS-7E	27.1km/h	45DS-7E	26.1km/h
40DS-7E	26.1km/h	50DA-7E	26.0km/h

Comfortable Operation

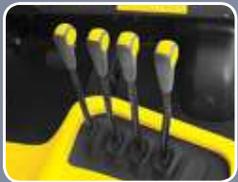

Adjustable steering wheel
Steering wheel with horn button can be adjusted by a lever on the right-hand side for the most comfortable operator position.

Easy and safe shift lever
A single lever on the left side of the steering column gives the operator fast and easy controls of the direction.

Multi-function switch lever
Multi-functional switch lever gives easy access to lights and horn.

Quick response of operating control levers
Only minimal operator's effort is required for precise, safe and productive control.

■ Some of the photos may include optional equipment.

Ergonomically designed with the operator in mind!

A design based on human engineering relieves fatigue and increases operator's efficiency.

Ergonomically positioned pedals
Based on human engineering, the accelerator, brake and inching pedals are optimally positioned for convenience while operating the equipment.

Cup holder & console box
Additional storage spaces are located inside the operating space for operator's convenience.

New high visibility for safe operation
The operator is able to work with increased safety and accuracy due to a wider view mast.

Easy access of electrical components

Various electric parts are centralized in dash board resulting in improvement in maintenance.

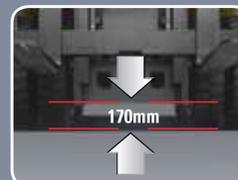

Expansion bellows

The expansion bellows absorbs vibration and reduces noise generated from the exhaust gas system and also extends the life cycle of exhaust gas system.

Bright, protected headlights

Bright, protected headlights is positioned for exceptional visibility.

Ground clearance

The engine and transmission are assembled horizontally and positioned high in the frame to protect expansive components during operation on rugged surface.

Centralized design for easy service!

An ideal arrangement of component parts ensures easy accesses and conveniences for the maintenance.
